Samir Chaulagain

SUMMARY

A computer science student pursuing a BSc Hons. Degree with a strong educational background, having experience in project management, development, and deployment. I worked as a developer on a few projects like E-challan system and have experience in designing and prototyping. I am well-equipped to design, deploy, and manage scalable and reliable applications on the AWS platform. Having a skillset in configuring and securing cloud environments and committed to staying updated with the latest advancements in cloud technology. My Final Year Project (FYP), the Muse rental hub, was successfully containerized using Docker and deployed on a Google Cloud Platform (GCP) VM instance. I am committed to staying updated with the latest advancements in cloud technology and excited about opportunities to apply my skills and knowledge.

EXPERIENCE

APPRENTICE AT TROOPERS TRAVEL AND TOUR

- Motivated and dedicated developer actively gaining practical experience and honing skills in computer science.
- Demonstrates a passion for coding and problem-solving, expressing eagerness to contribute to innovative projects and collaborate with seasoned professionals.
- Possesses hands-on experience in various aspects of the development lifecycle, actively participating in real-world projects and making valuable contributions.
- Proficient in a range of technologies, comfortable working with different frameworks and tools.
- Thrives in challenging environments, embraces learning opportunities from experienced mentors, and is known for being a quick learner, adaptable, and possessing strong problemsolving abilities.
- Highly motivated to apply acquired skills and contribute to project success while continuously refining technical expertise.
- Actively seeking opportunities for further career development in software development with a focus on DevOps practices.
- Knowledgeable in DevOps tools and practices including Docker, Kubernetes, Git, and cloud basics.

Seeking opportunities for both personal and professional growth in the field of software development, particularly in roles that offer exposure to DevOps methodologies and technologies.
